CLIMATE CHAMBER ICH

Compressor-cooled stability test chambers developed by Memmert stand out due to their unparalleled temperature and humidity homogeneity for longterm stable ambient conditions. The climate chamber ICH has been specially designed for testing pharmaceutical products

Other features

- Data will be stored in the memory,
- minimum consumption, energy saving.
- almost vibration free/low noise.
- Lockable door.
- Alarm for temperature and humidity

All-round protection of samples

No icing, no drying out of samples, no dehumidification of the working chamber. Cooling aggregate and heating of the ICH are situated outside the working chamber in the air jacket surrounding the entire chamber thus ensuring quick and precise temperature control. Furthermore, the motor-driven forced air circulation, adjustable in 10 % steps, ensures particularly homogenous temperature distribution.

Ventilation

Forced air circulation in working chamber adjustable from 10 to 100 % in 10 % steps
